
Cyber Warranty

Differentiate Your InfoSec Solution

Backed by A-rated global insurers

Limits to \$1,000,000 per customer

Terms based on product performance

Ransom, forensics & remediation

CISO's face a dizzying array of security options with too many sold by aggressive sales tactics and exaggerated promises. Less than 1% of InfoSec vendors guarantee product performance.

Some 57% of CISO's think security warranties from InfoSec providers are a brilliant idea and another 41% like the idea but are skeptical about the reality the industry will put its money behind its mouth and offer warranties on their products*.

Until now, insurance underwriters possessed neither the technical knowhow nor the appetite to back security guarantees.

Our **Cyber Warranty** allows select vendors to offer security guarantees that provide customers financial relief to recover from isolated performance events.

Of course, not all vendors will qualify. Terms are based on your exceptional track record and supporting efficacy data.

Offered exclusively by Cyber Risk Underwriters. For over 25 years, our team has provided expertly designed insurance solutions that help our clients grow with confidence.
